

Toyota Forklift Parts

Toyota Forklift Part - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, continues to be the top selling lift truck provider in the U.S. This company has been headquartered out of Irvine, California for well over 40 years, offering a wide-ranging line of quality lift trucks. With a remarkable reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent development, and its environmental methods. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift trucks emit 70 percent fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A. - Leading the Industry

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its dedication to construct high quality lift trucks while offering first-rate client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is amongst the magazines impressive World's Most Admired Companies.

Redefining Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding corporate philosophy towards environmental conservancy within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability cannot be matched by other organizations and undoubtedly no other resource handling manufacturer can yet rival Toyota. Environmental responsibility is a key characteristic of corporate decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more intricate 2010 emission standards. The end invention is a lift truck that creates 70 percent less smog forming emissions than the existing Federal standards tolerate.

Furthermore in 2006, Toyota developed a relationship with the Arbor Day Foundation, furthering their dedication to the environment. More than 57,000 trees have been planted in district parks and national forests damaged by environmental reasons such as fires, as a result of this partnership. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of sellers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift vehicles offer enhanced durability, visibility, efficiency, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps decrease the chance of incidents and accidental injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability can perceive factors that could lead to lateral volatility and potential lateral overturn. When any of these conditions have been detected, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding durability.

The SAS systems were originally adopted on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped thrust Toyota into the lead for industry safety standards. Now, SAS is utilized on nearly every new internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory worker training, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's standard of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training program to help consumers meet OSHA standard 1910.178. Education programs, video lessons and assorted resources, covering a broad scope of matters-from individual safety, to OSHA regulations, to surface and cargo situations, are accessible through the dealer network.

Since the transaction of its first lift vehicle in the U.S. to the construction of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained an unbroken presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service

components, with the whole commitment exceeding \$113 million dollars.

The modern NCC was built to operate for TMHU buyers and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its originator, Sakichi Toyoda, in 1867, and finally a training center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure total customer satisfaction.
